

MARK ANDREI V. ENCANTO

Full-Stack Software Engineer | AI & Enterprise Systems

Iloilo City, Philippines | +63 929 654 8016 | markvencanto@gmail.com | [linkedin.com/in/mark-andrei-encanto-962179351](https://www.linkedin.com/in/mark-andrei-encanto-962179351) | mrmrkndrei.vercel.app

SUMMARY

Summa Cum Laude CS graduate and Full-Stack Developer specializing in AI, enterprise web platforms, and UI/UX design. Skilled in React, TypeScript, Python, PostgreSQL, and machine learning, with a strong background in technical leadership, cloud deployment, and team mentorship.

EDUCATION

West Visayas State University

La Paz, Iloilo City

Bachelor of Science in Computer Science

August 2022 – June 2026

- Graduated with **Highest Academic Distinction (Summa Cum Laude)** with a **GWA of 1.22**, ranking among the top **1.2%** of the university (23 out of 1,871 graduating students) and **1 of only 5** in the College of Information and Communications Technology (CICT).
 - **DOST Junior Level Science Scholar (2024) 20.54%** Nationwide Passing Rate (2696 out of 12000+ applications).
-

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, SQL, HTML5, CSS3
 - **Frontend Development:** React.js, Vue, Next.js, Redux, Tailwind CSS, Framer Motion
 - **Backend & Architecture:** Node.js, Express.js, REST APIs, Prisma ORM, System Design, Clean Architecture, MVVM
 - **Database Management:** PostgreSQL, pgAdmin, Supabase
 - **AI & Data Science: Machine Learning,** NLP, Deep Learning, Computer Vision, Recommendation Systems, PyTorch, Pandas, Scikit-learn, SpaCy, OpenCV, ONNX,
 - **UI/UX & Design:** Figma, Adobe Photoshop, Wireframing, Prototyping, Design Systems, User Research, User Persona
 - **Cloud & Tools:** Git, GitHub, WebSockets, Google Cloud Platform, Vercel, Podman, Docker
 - **Professional Skills:** Technical Leadership, Agile Collaboration, Documentation, Knowledge Transfer, Project Management, Stakeholder Communication
-

PROFESSIONAL EXPERIENCE

Department of Science and Technology (DOST) – Central Office

Lead Software Developer Intern

Jan 2026 – May 2026

- Led a team of **8 developers** in building frontend solutions for a multi-dashboard enterprise management platform supporting nationwide project monitoring and reporting using clean architecture, redux, and MVVM principles.
- Developed **15+ enterprise system features** and **5 reusable React components**, improving development consistency and accelerating feature delivery across multiple modules.
- Conducted **2 technical knowledge-transfer sessions** attended by **14+ developers** and stakeholders, improving onboarding efficiency and repository adoption.
- Implemented SQL-based database insertion and validation workflows using **PostgreSQL and pgAdmin** to support dashboard visualization and analytics testing.
- Developed **2 major modules** for a national project visualization platform used to monitor government initiatives across the Philippines.

MARK ANDREI V. ENCANTO

Full-Stack Software Engineer | AI & Enterprise Systems

Iloilo City, Philippines | +63 929 654 8016 | markvencanto@gmail.com | [linkedin.com/in/mark-andrei-encanto-962179351/](https://www.linkedin.com/in/mark-andrei-encanto-962179351/) | mrmrkndrei.vercel.app

TECHNICAL PROJECTS

SmartSense – AR Audio-Visual Translation System | Leader, UI/UX, Developer

- Engineered a full-stack assistive system utilizing the **Meta Glasses 3 SDK** to interface AR hardware with a **custom mobile app**, leveraging **WebSockets** for a near real-time bidirectional data streaming to a laptop for local model hosting and inference.
- Developed a **multimodal PyTorch deep learning model** trained on the Oxford LRW and LRS2 datasets, processing over **48,000 video utterances** and a **17,600+ word** vocabulary to achieve a **Word Error Rate (WER) of 24.3%** and **Character Error Rate (CER) of 17.4%**.
- Validated software quality and system efficacy through rigorous Content Validity Ratio (CVR) assessments and ISO standard evaluations (ISO 9241:11), conducting targeted testing with **10 validation experts** and **13 end-user respondents**.

Tech Stack: Python, PyTorch, WebSockets, Flutter

IPSYNC – Internship and Collaboration Hub | Leader, UI/UX, Full Stack Developer

- Architected and developed a **full-stack platform** managing **multiple data collections** to connect students, faculty, and industry recruiters within a centralized ecosystem.
- Engineered a scalable Express.js and MongoDB backend, integrating **5+ REST APIs** and **Role-Based Access Control (RBAC)** to securely handle multi-role user workflows and application data.
- Designed and implemented **20+ responsive screens** in Vue.js utilizing Shadcn UI components, creating a highly modular frontend architecture with clean data flow across distinct user paths.

Tech Stack: Vue.js, Shadcn UI, Express.js, MongoDB, REST APIs

SentiSize – Emotion Sentiment Analysis System | Leader, UI/UX, Full Stack Developer

- Led a team of 7 through the complete software lifecycle to develop a full-stack sentiment analytics web platform capable of classifying user text into **11 distinct emotional categories**.
- Engineered **NLP pipelines** and **Support Vector Machine (SVM) models** trained on a dataset of **58,009 English-language Reddit comments**, achieving up to **77% precision** in identifying high-signal emotional indicators.
- Developed interactive dashboards utilizing **HTML, CSS, and Javascript**, seamlessly integrated with a **Flask backend** to dynamically visualize real-time emotional trends and sentiment distributions.

Tech Stack: Python, SVM, NLP, React, Data Visualization

REKOM – Hybrid Movie Recommendation System | Lead UI/UX, Full Stack Developer

- Architected a full-stack web application processing the **MovieLens 1M benchmark dataset**, managing over **1 million behavioral ratings** across **6,040 distinct user profiles** to deliver dynamic, personalized recommendations.
- Engineered a Python-based hybrid recommendation engine combining collaborative filtering and NLP pipelines to analyze metadata across **~3,900 movies**, effectively mitigating the cold-start challenge for new users.
- Developed a responsive frontend interface utilizing **HTML, CSS, and Javascript** for dynamic user interactions, integrated seamlessly with a **Flask backend** to serve and visualize complex machine learning recommendation payloads.

Tech Stack: HTML, CSS, Javascript Python, Machine Learning, NLP,
